

Design Requirements

v1.0

DESERT DUNE

Tournament Slot Platform — Full Design Requirements

Prepared for: UI/UX Designer

Product: Points/entry-fee slot tournament platform (South Korea, KRW ₩)

Two theme families — **Monster** (default) & **Desert**, each with Light & Dark

Platforms: Responsive web (desktop + mobile)

1. Product Overview

Desert Dune is a **slot-machine tournament platform**. Players deposit money into a wallet, pay an entry fee to join a timed tournament, receive a fixed stack of tournament coins, and play a 5×5 slot to grow that stack. A live leaderboard ranks players by coin balance; when the tournament ends, top finishers win a prize pool paid to their wallet.

- **Currency:** Korean Won (₩), whole numbers, thousands separators (e.g. ₩100,000).
- **Deposits:** real money via Stripe (card, Apple Pay, Google Pay) — a payment/deposit UI is required.
- **The slot is only playable inside a tournament** (no free play).
- **Two visual themes** the admin switches platform-wide; each supports Light and Dark that each user chooses for themselves.

Compliance: Real-money entry fees + cash prizes are regulated gambling in South Korea. Designs should include clear **18+ / play-responsibly** messaging, and the product needs legal/licensing review before launch.

2. Users & Roles

Role	Needs
Player	Sign up (full name, email, password), deposit funds, browse & join tournaments, play the slot, watch the live leaderboard, see results/winnings, manage wallet & profile, switch light/dark.
Admin	Single dashboard: create/manage/settle tournaments, view platform stats, manage users/models/transactions/audit log, and switch the platform theme family (Monster/Desert).

3. Brand & Typography

- **Wordmark:** “DESERT DUNE” set in **Cinzel Decorative** (ornate serif, bold/black) — used for the logo, hero headings, and in-game title.
- **Display / numeric:** **Orbitron** (geometric) for banners & emphasis; **Impact / Arial Black** style for the in-game monster symbols.
- **Body:** system sans (San Francisco / Segoe UI / Roboto).
- Tabular numerals for all money/score values.

4. Theming System

Two **theme families** set platform-wide by an admin: **Monster (default)** and **Desert**. Each family has a **Light** and **Dark** appearance chosen per-user. Every component reads a shared set of design tokens — the designer should treat these as the palette, and may propose refinements.

Monster — Light DEFAULT FAMILY

Token	Hex	Token	Hex
 bg	#eef2e8	 accent	#2f9e4f
 surface	#ffffff	 accent-2	#c0392b
 surface-2	#e5ede0	 win	#2f9e4f
 border	#cedcc2	 danger	#b32d1f
 text	#17231a	 text-dim	#5e7358

Brand gradient: green → red — `linear-gradient(135deg, #14532d, #2f9e4f 52%, #9e2a1f)`

Monster — Dark

Token	Hex	Token	Hex
 bg	#0a130e	 accent	#46d178
 surface	#101f16	 accent-2	#ff5147
 surface-2	#16291d	 win	#46d178
 border	#274434	 danger	#ff6b6b
 text	#e9f6ea	 text-dim	#8cb396

Desert — Light

Token	Hex	Token	Hex
 bg	#f6f0e6	 accent	#c68a1c
 surface	#ffffff	 accent-2	#0e9488
 surface-2	#f1e9d9	 win	#15925f
 border	#e5d9c2	 danger	#c0392b
 text	#2b2016	 text-dim	#8a775a

Brand gradient: warm sand/copper — `linear-gradient(135deg, #7a3212, #b8791a 60%, #e8a252)`

Desert — Dark

Token	Hex	Token	Hex
 bg	#16110c	 accent	#e6b23f
 surface	#211a12	 accent-2	#2ee6c4
 surface-2	#2c2318	 win	#34d399

 border	#433525	 danger	#ff6b6b
 text	#f6ecda	 text-dim	#ad9c80

All four combinations must be designed with legible contrast. The accent is used on primary buttons with dark text; verify contrast in Light especially.

5. Screens

Screen	Route	Key content
Login	/login	Split card: themed brand panel (gradient + monster mascot on Monster) + form (email, password with show/hide eye). Link to register.
Register	/register	Same layout; fields: full name, email, password (show/hide). 18+ note.
Home	/home	Landing after auth. Themed animated hero (gradient + drifting semi-transparent creatures), greeting, CTAs (Enter tournament / Add funds), wallet balance, quick tiles.
Tournaments (Lobby)	/tournaments	Grid of tournament cards: name, entry fee, coins granted, prize pool, players, live countdown, Enter button. Monster shows a mascot beside the header.
Tournament / Game	/game/tournament/[id]	Immersive full-screen. Top bar (back, name, countdown, prize pool). Center 5x5 slot board with on-frame controls. Live Leaderboard drawer (collapsed vertical tab, opens on hover/tap). Join gate & results states.
Wallet	/wallet	Balance hero (gradient), Deposit flow: preset amounts (¥ 10k/30k/50k/100k) + custom, payment methods (card, Apple Pay, Google Pay), transaction history.
Settings	/settings	Light/Dark appearance toggle; sound & animation toggles.
Admin Dashboard	/admin	One page: platform stat cards, tournament create form + management table (Cancel / Settle & pay), quick links to Users/Models/Transactions/Audit.
Admin Settings	/admin/settings	Platform theme family switch (Monster/Desert) with swatch previews.

6. The Slot Game (5×5)

- **Grid:** 5 reels × 5 rows. Ways-to-win. Symbols: 9, 10, J, Q, K, A (low), a crest/high symbol, a jackpot symbol, a WILD, and a SCATTER.
- **Board frame:** an ornate “cabinet” surrounding the reels, with a bottom bar holding the controls (SPIN dial, “?” rules dial, and a Bet / Win / Coins readout).
- **On-frame HUD:** SPIN button (left dial), “?” help (right dial), Bet input + Win + Coins (center). During free spins the SPIN button becomes “FREE (n)”.
- **Backgrounds:** Desert = a warm scene; Monster = a dark dungeon with drifting glowing eyes.
- **Flanking art:** Monster shows large creatures on either side of the board on wide screens.

Currently implemented as: Desert uses illustrated image assets (board + symbols); Monster is drawn programmatically (green stone “maw” frame with fangs on all sides, glowing eyes, warts, ooze; toxic-green letter symbols, skulls, eyeball scatter, monster-face wild, gold crowned jackpot skull). **The designer may replace either with higher-fidelity original artwork.**

7. Monster Theme — Art Direction

- **Mood:** playful-spooky “creature feature.” Toxic green + blood red. Not gory/horror.
- **Motifs:** slime/ooze, fangs, glowing eyes, warts, horns, skulls, tentacles, cracked stone.
- **Mascot & creatures:** multiple **distinct** creatures (blob, cyclops, ghost, slime, bat) — never one repeated image. Home uses them semi-transparent and drifting.
- **Board frame:** a monster “maw” — reels sit inside a mouth ringed with teeth, with eyes on the brow/sides.
- **Symbols:** monster-styled 9/10/J/Q/K/A + skull, eyeball (scatter), monster face (wild), crowned skull (jackpot). Big, clean, high-contrast.

8. Desert Theme — Art Direction

- **Mood:** warm luxury — sand, gold, teal; “alchemy / steampunk” cabinet.
- **Motifs:** brass, ornate filigree, gems, potions, coins.
- **Home decor:** drifting coins, moon, sparkles (semi-transparent).

9. Components

- **Buttons:** primary (accent fill, dark text, pill), secondary (outline), circular game dials.
- **Cards / “surface”:** rounded (16–24px), 1px border token, soft shadow.
- **Inputs:** surface-2 fill, border token, accent focus ring; password field with eye toggle.
- **Nav shells:** Player top nav (Home, Tournaments, Wallet, History, Profile, Settings) + wallet balance + logout; Admin top nav. Both collapse to a scrollable bar on mobile.
- **Leaderboard drawer:** vertical “LEADERBOARD” tab, slides open on hover/tap.
- **Status pills:** Live / Upcoming / Ended / Settled.
- **Banners:** win / free-spins / jackpot celebration overlays.

10. Motion

- Reel spin: blurred scroll → gentle settle (no harsh snap). Winning symbols pulse subtly (must not overflow the cell).
- Monster: floating/blinking creatures, blinking background eyes, pulsing frame glow.
- Home: slow drifting decorations at low opacity.
- All motion must respect `prefers-reduced-motion`.

11. Responsive

- Must be fully usable on mobile (~390px) with **no horizontal scroll** and no vertical scroll on the game screen.
- Split auth card → single column (brand panel hidden on small screens).
- Game: board scales to fit; side creatures hidden on small screens; leaderboard becomes a tap-drawer.
- Grids reflow to 1 column; admin tables scroll horizontally within their card.

12. Deliverables Checklist (for the designer)

- Logo / wordmark lockups
- Full token palette refinement (4 themes)
- Component library (buttons, cards, inputs, nav, pills, drawer, banners)
- Home hero + creature/decor set (Monster & Desert)
- Tournament card + lobby
- Slot board frame art (Monster & Desert)
- Full symbol set x2 themes (9,10,J,Q,K,A, crest, jackpot, wild, scatter)
- Game backgrounds (dungeon / desert)
- Wallet / deposit flow
- Admin dashboard + settings
- Mobile layouts for all screens

Asset licensing: all artwork must be original or properly licensed for commercial use. No unlicensed stock/Google images — including for testing.
